

## Veeo AuctionPlus for Merchants

Veeo AuctionPlus instantly enables web merchants to sell their products on eBay - the world's largest online marketplace - using their existing merchant account and payment gateway service. It's a complete service that gives you the power to sell on eBay all in one affordable package.

Did you know what eBay sellers say is the most difficult part of selling? It's hunting down their winning bidders to agree on a payment method and complete the transaction. This process can take weeks and often results in the buyer losing interest. And with more and more buyers using BuyItNow as their preferred purchase option, you need an instant payment option.

Veeo AuctionPlus has changed all that. Now you can accept credit cards for your eBay items and let customers checkout instantly. No more waiting for funds to transfer from PayPal. In a snap you can start using Veeo AuctionPlus and get your money instantly. Best of all, Veeo AuctionPlus includes a popular, fully functional shopping cart that's completely integrated with USAePay. That means it's ready to go with all of your existing product offerings. You benefit from increased merchant satisfaction and added revenue!

## Merchant Benefits
